

OPIE OILS' PLANNED PAYMENT FACILITY

What is the Opie Oils Planned Payment Facility?

Opie Oils offers its domestic customers the ability to spread the payments for their home heating oil over 12 months based on a Direct Debit arrangement.

Many of our domestic customers like to use this method of payment as it allows them to spread the cost of their oil deliveries over a planned year. All payments are made on the seventh of the month and we agree with you at the start exactly how much you will need to pay based on your annual consumption.

Please note, if monthly payments stop at any time, we will require settlement of any outstanding balance in full immediately.

Are there conditions to joining the Opie Oils Planned Payment Facility?

We require that you have made at least 3 recent heating oil purchases from us or that you have made at least 3 of the agreed monthly payments prior to being able to make a purchase using the Planned Payment Facility.

Please note: we may restrict the quantity of litres purchased or require further payments depending on the account balance.

How do I join the Opie Oils Planned Payment Facility?

Firstly, work out how much fuel you use in a year and match that up with the estimated monthly payment table below - this tells you how much you'll need to pay each month.

Next, fill out the application form and the direct debit mandate and then send these back to us by post well in advance of needing to use the Facility. We will consider your application (which can take up to 14 days) and let you know when it has been approved.

If you do not have a credit balance with us, we will require that you pay 50% of the cost of the first order by credit or debit card at the time of ordering. The balance of 50% will be put on your Planned Payment Facility.

How much will I have to pay monthly?

This varies depending on your consumption (see table) and will be reviewed periodically to ensure that a high debit or credit balance is not building up.

How do I know what my Planned Payment Account balance is?

We send a statement of account to you every time you have a delivery and annually in August when we review all payments. At this time we will advise if your payments need adjusting.

Estimated Monthly Payments

ESTIMATED ANNUAL CONSUMPTION	MONTHLY PAYMENT
1000 Litres	£60.00
1500 Litres	£90.00
2000 Litres	£120.00
2250 Litres	£135.00
2500 Litres	£150.00
2700 Litres	£160.00
3000 Litres	£175.00
4000 Litres	£230.00
5000 Litres	£295.00

The payment levels are reviewed every quarter based on the cost of oil. In arriving at these figures we have tried to take into account seasonal fluctuations in prices, but we cannot predict fluctuations caused by international events that may disrupt the world trading of oil.

Opie Oils reserves the right to decline any Planned Payment Facility application.

OPIE OILS PLANNED PAYMENT APPLICATION FORM

I wish to apply for an Opie Oils Planned Payment Facility.

Having read and understood the details of the Planned Payment Facility, I sign this form as acceptance of Opie Oils Terms and Conditions.

I have also signed and completed the Direct Debit mandate and would ask for this to be effective on the:

7th 2011

My Annual Fuel Requirement is: ,000 Litres

My Monthly Direct Debit Payment is: £
